REAL ESTATE. REDEFINED.

Building Real Value Through Real Assets.

Real Estate. Real Assets. Digital Infrastructure.

IN THE WORLD, AT HOME.

Imagine arriving somewhere extraordinary and feeling that it is already yours.

Real estate is more than an asset. It is a place to arrive, to belong and to return to.

Dein Abschnittstext

01 ARRIVE

Across carefully selected destinations, exceptional properties become part of a wider way of living. Fractional ownership is designed to connect people with remarkable places around the world, without asking them to choose just one.

02 BELONG

A home is not defined by one address. It is created through memories, rituals and the feeling of being expected. Curated properties, distinctive experiences and carefully selected partnerships turn real assets into places with meaning.

03 TRUST

Behind the experience is a modern AI-supported infrastructure designed to strengthen transparency, documentation and traceability throughout the ownership journey. Its logic is inspired by the clarity of a land registry and remains subject to the applicable legal and regulatory framework.

One platform. Many places. A world to call home.

THE BUSINESS MODEL

The platform is designed around a simple value creation cycle:

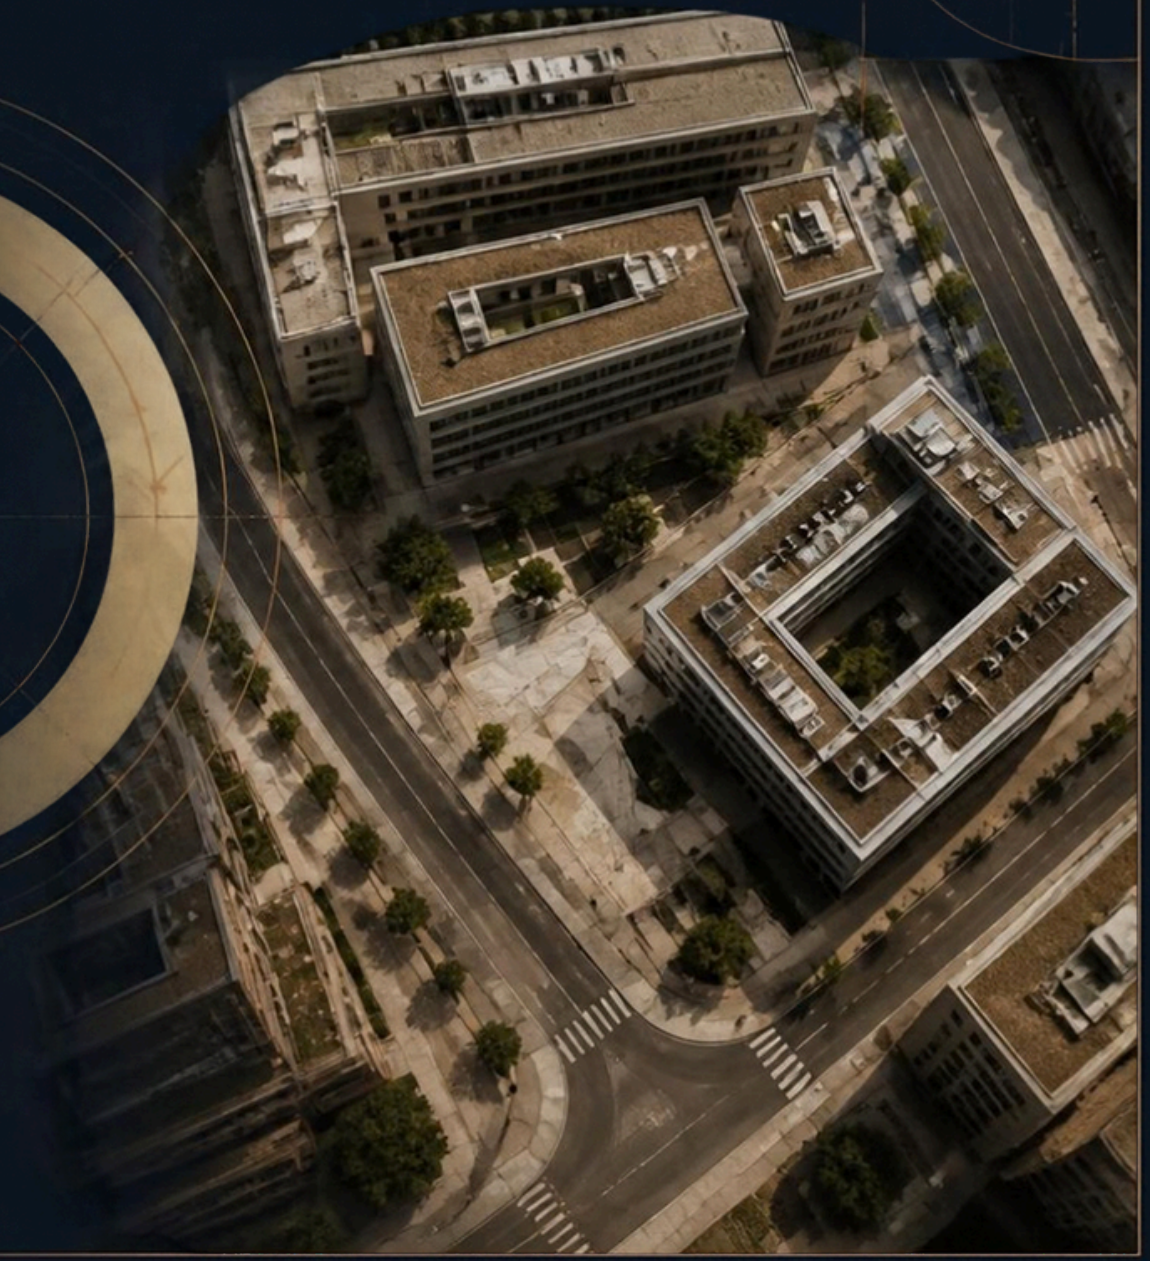

01 ACQUIRE
Identify attractive properties and development opportunities.

02 DEVELOP
Renovate, modernise and construct.

03 OPTIMISE
Improve the economic and operational performance of the assets.

04 GENERATE
Generate rental income and realise value through selected property sales.

05 REINVEST
Deploy capital into the next generation of projects.

REAL ESTATE MEETS TOKENISATION

Blockchain technology will provide the digital infrastructure of the platform.

The planned ecosystem is designed to enable digital participation, controlled token distribution, staking functionality and, subject to applicable legal and regulatory requirements, secondary-market transferability.

The underlying strategy remains focused on real estate assets and real economic activity.

A LONG-TERM APPROACH

The programme is designed around a long-term investment horizon.

Rather than focusing solely on short-term token price movements, the platform aims to build a portfolio of tangible assets and create value through professional real estate development and management.

THE INVESTMENT PROGRAMME

The initial financing target is:

EUR 120 MILLION

The capital will be used to build a diversified real estate portfolio and to finance:
property acquisitions; development sites; renovation and modernisation; new construction projects; project development; professional asset management; technology and digital infrastructure; and the long-term expansion of the platform.

Our objective is straightforward:
Acquire real assets.
Create real value.
Generate real economic activity.
Build a scalable investment platform.

THE VISION

We believe the next generation of real estate investment will combine:

Tangible Assets

Professional Real Estate Development

Digital Ownership Infrastructure

Blockchain Technology

A New Real Estate Investment Ecosystem

The EUR 120 million financing programme is intended to provide the capital base for this vision.

Further information regarding the token structure, investment terms, investor eligibility, legal framework and participation opportunities will be published as the project progress.

Real Estate
Real Assets.
Digital Infrastructure.
